

Treatments

Sun solutions because sun protection is not just for summer anymore.

The best way to protect the eyes, eyelids, and skin around the eyes from sun-related damage is to wear quality glasses that block 100% UV rays and also shield the eyes from blue light.

LC PHOTOCROMICS

Expect the following features with all of our Light Adaptive Lenses

LC Mirrors are more than a fashion add-on. They provide utmost comfort by reflecting light away from the lens surface. This can reduce eye strain caused by glare and is particularly beneficial for activities in bright surroundings, such as snow, water, or sand.

LC MIRRORS

Powerful Protection with Style

- ▶ 100% UV protection
- ▶ Eliminates 99% of reflected glare
- ▶ Premium mirror process that provides a stronger bond between the lens and mirror coating, increasing durability and scratch resistance
