DELUXE SOLID

Deluxe Solid is our highest-grade microfiber cleaning cloth—not a lower-quality promotional product.

Made with premium 250 GSM microfiber, it is thicker than the 230 GSM cloths commonly offered by many optical suppliers. Trusted by the majority of our customers for more than 10 years, Deluxe Solid provides exceptional softness, strength, absorbency, durability, and cleaning performance. Its fine microfibers gently lift dirt and particles while helping protect lenses from scratches, effectively absorb moisture, fingerprints, and oils, and use electrostatic properties to attract and hold dust instead of simply pushing it across the lens.
