

# BLUE LIGHT: MINIMIZE DIGITAL EYE STRAIN

Eye protection is important, especially for children and anyone who use smartphones, tablets, and computers for more than two hours per day.

The use of these devices may lead to symptoms like headaches, tired eyes, and interrupted sleep<sup>6</sup>. Offer the blue light protection that your customers require.

## CLEAR BLUE FILTER™ LENSES

High Energy Visible (HEV) light protection in a clear everyday lens.

- ▶ Uncompromisingly clear lenses
- ▶ Filtering properties are built into the lens, not a coating
- ▶ Carries the Skin Cancer Foundation Seal of Recommendation
- ▶ Blocks 100% of High Energy Visible (HEV) light up to 400nm<sup>7</sup>

## LC BLUE FILTER COATING (HMB)

An effective treatment that can be applied to any lens type, where limiting blue light exposure is important.

- ▶ Relaxed vision in front of screens
- ▶ Improved contrast
- ▶ Enhanced comfort
- ▶ Superior scratch resistance
- ▶ Easy to clean and smudge resistant
