

PROGRESSIVE LENSES

- + Progressive lenses can be challenging. When a customer puts on their new eyeglasses for the first time and can't see comfortably, they become frustrated.
-
- + This means getting it right the first time is essential. When you can offer lenses with technologies that specifically target easy adaptation, you have the opportunity to improve customer satisfaction.
-

Introducing our latest breakthrough in progressive lens technology: LensChoice Elite 4 HD featuring Periphery Precision Optics.

Building upon the success of our top-selling LC Elite 3 HD, the LC Elite 4 HD represents a significant advancement in digital design. For the first time, our lenses incorporate Periphery Precision Optics, revolutionizing binocular vision and achieving unparalleled balance in viewing experience.

Periphery Precision Optics technology addresses unwanted prismatic effects and imbalances between the eyes by effectively compensating for errors, ensuring optimal visual performance.

With the upgrade to LC Elite 4 HD, not only do patients adapt remarkably well, but your staff will also find the prescribing process effortless. Invest in LC Elite 4 HD for a sound business decision that prioritizes customer satisfaction and ease of use.

LC ELITE 4 HD Near, Distance, Balance

Best Binocular Vision

- ▶ One of our best selling progressive designs, LC Elite 3 HD, now equipped with Periphery Precision Optics
- ▶ Smoother adaptation, less swim and sway effect
- ▶ Premium quality at an affordable price
- ▶ Three pre-customized designs: Near, Distance, and Balance
- ▶ Six corridor length options
- ▶ Improved visual comfort thanks to more stable vision in near and intermediate areas
- ▶ Improved depth perception and effortless focusing
- ▶ Wider and bigger lens blank up to 80mm in all materials, reducing cutout issues
- ▶
